

## LUXURY VINYL FLOORING PLANK AND TILE ADHESIVE

Beaulieu's Luxury Vinyl Flooring Plank and Tile Adhesive (GLV01-1 gallon, GLV04-4 gallon) are designed exclusively for use with our Luxury Vinyl Flooring (LVF) products. It is an advanced resin based adhesive featuring high aggressive shear strength. This adhesive is designed to have the LVF product installed while the adhesive is still transferable to the back of the material. It is formulated as a permanent adhesive for indoor use only. Beaulieu's LVF Adhesive is recommended when installing Beaulieu's Luxury Vinyl Flooring to create a strong permanent bond to your substrate.

Substrates should be prepared as outlined in the product specific installation guidelines which can be obtained by contacting Beaulieu Technical Services or at [beaulieuflooring.com](http://beaulieuflooring.com). Adhesive spread rates can vary based on the type of substrate. Recommended spread rates and trowel sizes are listed below:

### POROUS SUBSTRATES

**Porous substrates include but are not limited to concrete, flooring grade wood substrates, unwaxed VAT or VCT, etc. Porous substrates will absorb moisture.**

Coverage approximately 200 to 250 square feet per gallon

1/16" x 1/16" x 1/16" V notch trowel

### NON-POROUS SUBSTRATES

**Non porous substrates include but are not limited to sealed concrete, solid vinyl sheet goods, etc. Non-porous substrates will not absorb moisture.**

Coverage up to 300 square feet per gallon

1/16" x 1/32" x 1/32" U notch trowel

It is recommended that only the Beaulieu Luxury Vinyl Flooring Plank and Tile Adhesive be used when installing Beaulieu's LVF dry back products. In the event that an adhesive other than Beaulieu LVF Plank and Tile Adhesive is used please note that Beaulieu will not warrant any adhesive or adhesive bond other than the Beaulieu LVF Plank and Tile Adhesive with our LVF products. All other performance and wear warranties remain in effect, if the LVF has been properly installed following the installation guide as outlined for the specific product and properly maintained. If using an adhesive other than Beaulieu's LVF adhesive we strongly recommend that you conduct adhesive bond tests to determine the safety and suitability of the adhesive with Beaulieu's LVF.
